ABOUT ME

Frontend Developer with a background in drafting and cabinetry design. Strong independent problem-solving skills, a familiarity with technical documentation from the manufacturing industry. Recently built and deployed a frontend project using **Vue**, **TypeScript**, **Pinia**, and **Tailwind**, hosted on **Netlify** and available on **GitHub**. Keen to contribute to real-world applications and workflows and continue growing through hands-on experience.

SKILLS

Frontend Development

- Languages: JavaScript, TypeScript, Python, HTML5, CSS3
- Frameworks: **Vue 3** (Composition API), React (learning)
- State Management: **Pinia**
- Styling: **Tailwind** CSS, CSS3
- Tools: Vite, **Git**, VS Code

Design & Technical

- Responsive Web Design, Mobile-First Development
- RESTful API Integration, Axios, Fetch API
- Version Control: Git, GitHub
- Deployment: Netlify, Vercel
- Project Management: Agile methodologies

FEATURED PROJECT

SkyTrack

Flight Tracking Web Application

Live Demo: skytrack.jakegreen.dev | **GitHub:** github.com/jakeg96/skytrack

- Built real-time flight tracking app using Vue 3, TypeScript, and AviationStack API
- Implemented advanced filtering, search functionality, and responsive design
- Utilised Pinia for state management and Axios for API integration
- Technologies: **Vue 3**, **TypeScript**, **Pinia**, **Tailwind**, **Vite**

EXPERIENCE

Project Manager & Draftsman - All About Cabinets

2021 - Present | Gold Coast

- Create detailed technical drawings and specifications for custom cabinet manufacturing
- Collaborate with architects and clients to translate concepts into precise technical documentation
- Utilise CAD software to produce accurate measurements and material lists
- **Transferable Skills:** High attention to detail, technical problem-solving, interdepartmental communication, project planning

Key achievements:

- *Implemented a new quoting system to improve consistency and improve clarity of communication through automation and unifying information into a single database*
- *Introduced scheduling system to reduce phone calls, reduce interruptions to managers, and reduce on-site mismanagement*

INTERESTS

- Web Development
- UI/UX Design Principles
- Linux
- Web3
